"Misc Info"

4 December 1967

STATINTL

TO: [redacted]

SUBJECT: Ops AGE Modification, Contract FA-7322

Dear Jim,

Reference is made to your 9 November 1967 letter on this same subject. You are authorized to proceed with the changes described in referenced letter. We understand that you are unable to submit ECPs at this time. However, to implement this change you should issue an appropriate TCD/FSB with the understanding that you will submit an ECP for record purposes as soon as possible.

Since drawing changes corresponding to these two hardware changes will apparently not be available for some time, your FSB should contain sketch-type schematics which will serve as temporary tech data for this change.

Regards,

Phil
